# Pivot Arm Awning

Blades & Shades **Pivot Arm** Awning is a new spring arm awning system proudly developed and manufactured in Australia. The **Pivot Arm** Awning allows you to have all day shade, with light and ventilation, all whilst maintaining privacy. Its versatility allows it to suit most windows and extends to various levels of projection depending on your needs.

---

With spans up to 3.5mts, a **Pivot Arm** Awning can be either manually operated with a simple crank handle or motorized with full autonomous control with wind and sun sensors able to retract your awning in severe weather or extend when the sun is at its peak. The arms have an internal spring and are under constant tension, this keeps the fabric flat and taught.

---

Using a sunscreen fabric will filter the sunlight and still allow for maximum view or use an Acrylic Canvas to block the sun. Add a colour matched weather box to extend the life of your fabrics and add to the aesthetics of your home or office.

---
